SUMMARY

Aspiring Data Science undergraduate with a strong foundation in Python, Java, Machine Learning, and Data Analysis. Passionate about building AI-powered applications using predictive modelling and data-driven approaches. Skilled in data preprocessing, exploratory data analysis, and developing practical machine learning solutions.

EDUCATION

B. Tech in Computer Science and Engineering (Data Science)	2023 – 2027
Rajeev Gandhi Memorial College of Engineering and Technology, Nandyal.	CGPA: 7.43/10

TECHNICAL SKILLS

Programming Languages:	Python, Java, C, SQL
Core Subjects:	Data Structures, Object-Oriented Programming and DBMS
Libraries:	Pandas, NumPy, Scikit-learn and Matplotlib
Tools:	Git, GitHub, Streamlit, PostgreSQL and VS Code
Concepts:	Machine Learning, AI, Data Analytics and Prompt Engineering

PROJECTS

AI Resume Builder & Analyzer	Source Code - 2026
---	---------------------------

- Developed an AI-powered resume builder using Python and Streamlit for ATS-friendly PDF generation.
- Integrated intelligent resume analysis with personalized improvement suggestions.

Power Outage Duration Prediction	Source Code - 2025
---	---------------------------

- Developed a Machine Learning model for predicting power outage duration.
- Performed data preprocessing, model evaluation and data visualization using Scikit-learn, Pandas and Matplotlib.

INTERNSHIP EXPERIENCE

AI & Prompt Engineering Intern - Ongoing

Swecha & Viswam AI - 6 Months

- Contributing to Prompt Engineering for Telugu Large Language Models (LLMs).
- Collaborating on Artificial Intelligence applications and Large Language Model (LLM) development projects. Applying prompt optimization techniques and participating in model evaluation workflows.

ACHIEVEMENTS & CERTIFICATIONS

- Python - Kaggle: Completed hands-on training in Python programming covering functions, loops, data structures and problem-solving techniques.
- Pandas - Kaggle: Completed practical exercises involving data preprocessing, manipulation and exploratory data analysis.
- Earned LeetCode Beginner badges through consistent coding practice.
- Continuously improving problem-solving skills through Data Structures and Algorithms.
- Passionate about AI, Machine Learning, and Software Development.
